Elcometer 147 Weld Gauge: Side 1

Elcometer 147 Weld Gauge: Side 2

The Elcometer 147 Weld Gauge measures many aspects of welds both in metric and imperial units and includes:

- Angle of preparation 0 to 60°
- Misalignment (high – low)
- Fillet weld throat size
- Fillet weld length
- Excess weld metal (capping size)
- Depth of undercut
- Depth of pitting
- General linear measurements up to 60mm (2")
- 2mm (0.79") edge roundness test

### Inspection Accessories

During inspection sometimes the substrate or coating requires closer investigation. In dark or shaded areas, such as in ballast tanks or large production sites, etc., further investigation may require additional light.

It may be necessary to take a closer look at a specific area where you cannot get to. In this case an inspection mirror is required. For close up investigations the inspector may require magnification of the surface for a clearer understanding.
